

## SPECIFICATION AMENDMENTS ctd.

*dm* 10 *dm* *5/12/08* Please rewrite the paragraph running from line <sup>2</sup>14 to line <sup>4</sup>19 of page <sup>2</sup>2 of the Substitute Specification filed 05 December 2007 as follows:

In FIGS. 1 to 3, a sieve assembly 1 is shown having a generally horizontal rectangular screen 2 in turn held in a ~~n-annular~~ frame having four edges with respective frame elements 3 that project downwardly past the screen 2. The screen 2 and frame elements 3 are made of plastic and secured to each other, in particular by gluing, casting, or welding, or the screen 2 and frame elements 3 are unitarily formed of plastic. The plastic is preferably polyurethane. Several such assemblies form the sieve surfaces of a sieve and are individually easily switched.
